Master's Degree in Technology and Privacy

Join us and take part in the only **online technology and privacy master's degree**, and learn from **internationally renowned experts** in the field through an innovative and rigorous **'learning-by-doing'** education model. Have the chance to collaborate with a **community of likeminded fellow students**, while retaining your **autonomy**, and be **supported** by an administrative team who are dedicated to facilitating **your academic success**.

In a **world increasingly implicated** by **technological, security and privacy** challenges, the combination of a **solid theoretical foundation in technology, surveillance and privacy**; an in-depth **understanding of privacy and data protection laws**; and practical training in **IT-enabled data surveillance management** and policy **evaluation**, will prepare you for a **successful career** in the fields of **privacy policymaking and governance**, and many related professions.

Interested in investigating current issues, and opportunities, in the realms of privacy, data protection, policy and the information economy?

AIMS AND SKILLS

Undertake social impact assessment of technology development; carry out privacy consultancy for businesses and projects; bridge perspective gaps between ITC engineers and project decision-makers; understand technical and ethical surveillance ramifications; attain creative and analytical skills required to write policy; understand privacy-enhancing measures and emerging issues such as 'Big Data'.

CAREER OPPORTUNITIES

- Privacy manager
- Privacy policy analyst
- Data Privacy Officer (DPO)

Under the European Union Data Protection Directive, all companies with 250+ employees must have a qualified DPO on their team – this job is in high demand.
